

March 2020

## Manifest Your Creativity

It's time to take a break from responsibilities and have some fun expressing your innate creative talents and skills. Yes, you really do have creative energy! Whether you are currently using it or not, does not mean you can not access and rekindle it to enhance your life. Creativity is an energy just like everything else on planet Earth.

March is the 3<sup>rd</sup> month of the year and the wisdom of numerology tells us the vibrational energy of 3 sets the vibrational tone of creative expression. So, what is the energy of creativity? This is what the dictionary has to say; Creativity is about self-expression using the energy of inventiveness, imagination, imaginativeness, innovation, innovativeness, originality, individuality; artistry, expressiveness, inspiration, vision, creative power, creative talent, creative gift, creative skill, resourcefulness, ingenuity, enterprise.

This new decade year of 2020 is setting the vibrational energy for you to practice and engage in *Manifesting Your Mastery*. One of the most valuable tools you have to make this happen is your ability to *Manifest Your Creativity*. When you realize you can actually use your innate creativity skills to create your future, you will awaken one of the most powerful abilities you have.

Manifesting your creativity can be accomplished when you become aware of the time-tested process you have always used to develop new skills. First, is the process of discovery. What have you ever done in your life that may have been looked at as creative? (You may need to ask your friends and family.) Second, once you find a few experiences you created, you need to accept them and believe you do have creative abilities. Third, set your sites on something you would like to create now. Fourth, start creating!

Here are a few hints to activate your creative muscles. Change your surroundings (like your room, your desk, your office), explore new topics outside of your comfort zone (Metaphysics, music, art, science, new age articles), keep track of new ideas. Often new ideas will be a creative venture to enhance old ideas into something totally amazing. This just happened for me!!!

Another way you might try to awaken your creativity muscle is called the "Six Hats" technique.

- Red Hat: Look at the situation emotionally. What do your feelings tell you?
- White Hat: Look at the situation objectively. What are the facts?
- Yellow Hat: Use a positive perspective. Which elements of the solution will work?
- Black Hat: Use a negative perspective. Which elements of the solution won't work?
- Green Hat: Think creatively. What are some alternative ideas?
- Blue Hat: Think broadly. What is the best overall solution?

The best days in March to manifest your creativity are:

March 1, 3, 5, 7, 9, 10, 12, 14, 16, 18, 19, 21, 23, 25, 27, 28, 30.

~Wes Hamilton, Master Numerologist
